Student Evaluation of the Course

FASD 4-Digit Diagnostic Code Online Course

1 = poor   2 = fair   3 = good   4 = very good   5 = excellent

	Average Rank
The course as a whole was	4.9
The course content was	4.8
The amount you learned was	4.8
The relevance and usefulness of the course was	4.8
The clarity of instruction was	4.8
The use of examples and illustrations was	4.7
The effectiveness to practice your skills was	4.6
The value of the quizzes to self-assess your knowledge was	4.7
The effectiveness in teaching the subject matter was	4.8
The user-friendliness of the web-based format was	4.6

What aspects of this course did you feel were especially good?

- Excellent illustrations.

- The videos were helpful. I like the consistent format of reading, exercise and quiz. Completing the quizzes helped me think through the important aspects, and helped me feel more mastery of information only read by myself.

- Explanations from the ground up to a considerable level of expertise. Instructions for the most part were very clear, and the progress of the lessons made a lot of sense. The entire diagnostic system is brilliant and workable.

- I appreciated the various modes of learning from listening, reading, and visual, to practicing,… I also appreciated the clarity of instruction – the material was written clearly and concisely and the organization of the learning made sense to me.

- Content was clear to the point. Examples were realistic. Quizzes were relevant to content.

- This was my first web based course and I loved it. I would like more information on more classes.

- Thank you for providing this opportunity for people all over the world (who have a connected computer). This is a giant step toward diagnosis and eventually, prevention of this terrible syndrome.

- This course was among the best I have taken, and I have taken multiple professional continuing education courses. Thanks.
